Eating Enhancing Aparatus

# USER'S MANUAL

# Get started

Throughout human history, the primordial gesture of eating has taken on new meanings and sensorial experiences. Besides mere sustenance, eating holds essential experiential notions in society.

Trending western eating habits neglect some essential sensorial experiences in relation to food, under utilizing the core of what eating provides: the stimulation of all senses.

Simultaneously with the aging of our population reaching new heights by 2053, the way in which we interact with food can be a starting point to ensure stronger relationships with our elders. By enhancing senses while eating our focus can be on our ability to reconnect as a collective society.

PLEZURO looks for enhance the touch and synesthetic relationship between others senses to improve the sensorial act of eating.

The PLEZURO redesigns the act of eating. It focuses on senses and perception, allowing us to recover the primordial relationship between our hands and mouth, transforming it in a synaptic relationship between lost senses and eating.

## Components

1)

# plezuro

Eating Enhancing Aparatus

Vibrations with varied frequencies activating the taste buds

Arduino Sensor Stimulators

Signal path

Signal path

Motion sensor sends signals to the fingertip vibration caps as per movement of the fingers: closed and open

Eating Enhancing Aparatus

# Instructions - How to?

Plezuro utilizes an advanced technology that detects differences in the way we eat, vibrating and inducing hot or cold sensations to specific frequencies. Eating becomes a playful experience where individuals are stimulated across all 5 senses. Plezura attempts to combat the degradation of senses through eating by enhancing all of our senses while eating, stimulating the pleasure frequencies associated with tasting, smelling, touching, hearing, and seeing.

Step 1- Fully charge batteries

Step 2 - Place glove on index finger and thumb

Step 3 - Check that sensors are working when led lights blink twice

Step 4 - Proceed to use fingers to enhance your culinary experience
